

Contents

Day 1

Introduction

- Understanding the concepts
- Understanding the basics
- Revit Structure user interface

Understanding Modeling Revit

- Starting Revit & Opening a Project File
- Identifying User Interface Components
- Understanding the Ribbon (Tab-> Panels -> Tools)
- Adjusting Panel Title
- Understanding Quick Access Toolbar & Option Bar
- Understanding the Application Menu
- Understanding the Info Center Toolbar
- Understanding the Project Browser
- Understanding the Properties Palette
- Understanding the Type Selector
- Understanding the Status Bar

Understanding Modeling Revit (cont'd)

- Understanding the Drawing Area (Project Browser, Ctrl Tab, View > Windows, Option Bar-Invert Background)
- Understanding the View Controls, Navigation Bar & View Cube
- Understanding the Steering Wheels (F8 or Shift+W)
- Understanding the Option Dialog
- Understanding the Units and Snaps (Mange tab-Project Units)
- Starting a New Project From a recent Files
- Starting a New Project from the Application Menu (.rvt, .rte....)
- Managing Windows
- Saving and Closing Files

About families and family editor

- Introduction to families and family editor
- Creating components in the family editor

Contents

Day 2

Starting a New Project

Importing/Linking architect or structure files

- Importing/Linking a 2D AutoCAD file
- Importing/Linking an Revit Architectural file
- Importing/Linking Orion R18 file

Creating a Structural Model

- Creating Column Grid to the Imported Drawing
- Adding Structural Columns
- Creating Concrete Beam
- Creating Concrete Slab
- Creating Level and editing Upper Floor
- Creating Structural Plan in Project Browser
- Editing Floor (structural plan)
- Adding Shear Walls
- Adding Isolated Foundations

Annotating and Dimensioning

Structural Analytical Modeling

- Analytical Check

Concrete Details

- Cut Sections and Add Views to Sheets
- Model Based Concrete Detail Examples (Beam detail, Column detail, Slab detail & Footing detail)

Day 3

Creating Drawing & Drafting Views

- Creating a drawing sheet
- Adding a sheet to the project
- Creating new views in sheets
- Creating a symbol legend
- Drawing compilation
- Creating a Drafting View

Exporting Revit Structure Files

- Exporting CAD Formats
- Exporting CXL Format (Orion R17)
- Exporting SIC Format (Staad Pro V8i)
