KOSSAN PAINT (M) SDN BHD

Name Behind Quality

Introducing KOSSAN PAINT

Kossan Paint (M) Sdn Bhd has its humble beginning back in 1987. It has been putting its efforts in manufacturing and marketing of Marine Paints, Protective Coatings and Decorative paints that provided a total solution to the needs of protection and decoration. Encouraged by the wide acceptability of its wet paint products, Kossan Paint (M) Sdn Bhd went a step further to introduce Powder Coatings products in early 2001.

The company has continuously invested heavily in skilled training and product innovation (R&D) to provide superior quality at an affordable price.

Kossan Paint operates with total workforce of 180 workers and has grown from strength to strength not just through superior quality and services but also the employment of advance manufacturing equipment and aggressive R&D initiatives. Kossan Paint is able to roll out its products in a more cost-effective mode compared to its rivals.

Kossan Paint (M) Sdn Bhd currently runs on a state-of-the-art facility along Jalan Kapar, Klang, and Selangor. Spreading over a production area of 17,500 square meters, the plant is equipped the most sophisticated manufacturing equipment and an intergraded R&D department. The plant will have the capacity of churning out some 21,600 tonnes per annum of marine & protective coatings, powder coating, decorative paints & etc.

KOSSAN PAINT's Corporate Vision & Mission

Known for its superior quality and premium services with undivided support and commitment from its management and staffs, Kossan Paint (M) Sdn Bhd has invested heavily in skill trainings, upgrading courses and the provision of a conducive operating environment to foster a cordial and efficient working relationship and instill a sense of professionalism among its employees. Teamwork is an indispensable element that will bring the company to higher grounds.

Kossan Paint (M) Sdn Bhd aims to reduce the country's imports by developing value-added high-end products and strengthen its foreign exchange through a wide range of products that meet industrial requirements and international standards. As a member of Transocean Coatings Association based in the Netherlands, Kossan Paint always keeps abreast of contemporary global market trends with a pool of immense technological resources and industrial expertise.

Name Behind Quality

Awarded with ISO 9001 Kossan Paint draws its strength from uncompromising effort to maintain a respectable level of product quality and customer services. Untiring quality control is carried out at every stage – from product development to production and packaging, delivery to after-sale service.

A superior product quality alone is not sufficient to put Kossan Paint a notch above its peers. As in any other businesses, Kossan Paint deals with PEOPLE, mainly its loyal customers. As such, the company has singled out customer relationship as an important area in its quest to acquire greater achievement in the future.

Paying tribute to its advanced manufacturing equipment and aggressive R&D initiatives, Kossan Paint is able to roll out its products in a more cost-effective way compared to its rivals.

This has been manifested in its competitive pricing, which not only makes Kossan Paint's products reliable, but also affordable and much sought-after.

Marine & Protective Coatings

"Keeping your ships in excellent condition with Kossan Marine Coatings"

Painting steel is an efficient method of preventing corrosion as it forms a barrier against two factors needed for initiating the corrosion process: *air and moisture*. Therefore marine coatings are specially developed in order to protect ships against corrosion. It is important to realize that the performance of the paint is dependent on the quality of surface preparation and paint application.

Kossan Paint is a member of "Transocean Coating" in South East Asia since 1990, we hope we can serve you better.

Industrial Coatings

"Kossan Industrial Coating is a paint defined by its protective, rather than its aesthetic properties, although it can provide both."

The most common use of **Kossan Industrial Coatings** is for corrosion control of steel structures such as *offshore platforms, bridges and underground pipelines*. Other functions include intumescent coatings for fire resistance. Kossan Paint are one of the professional organization involved in the industrial coatings industry. Industrial coatings are often composites of various substances. A typical coating system may include a primer, an intermediate coat, and a top coat. The polymer film acts as a physical barrier between the steel substrate and the corrosive environment such as atmosphere, water and soil.

Epoxy Floor Coatings

"We Solve your flooring problems."

Kossan Epoxy Floor Coating is a finish material used in homes and commercial buildings especially *automotive and warehouse facilities*. This is due to the high durability and low maintenance of this material, even when exposed to frequent vehicle traffic and gasoline or chemical spills. Because of its seamless nature, it is also popular in *medical and laboratory settings*. It is used primarily as a floor covering, and forms a hard, shiny surface upon application. This product is also popular in *garages and showroom floors* due to its strength and resistance to damage. Like all epoxy products, it is a two-part system, composed of both a resin and a hardener, with color added to provide the desired finish.

Powder Coatings

"Powder Coating an excellent choice for the environment."

Powder coating is a type of coating that is applied as a free-flowing, dry powder. The coating is typically applied electrostatically and is then cured under heat to allow it to flow and form a "skin". **Kossan Powder Coating** is mainly used for coating of *metals, such as household appliances, aluminium extrusions, drum hardware, and automobile and bicycle parts.*

It provides a hard finish that is tougher and more durable finish than liquid paints can offer, while still providing an attractive finish. Powder coated products are more resistant to diminished coating quality as a result of impact, moisture, chemicals, ultraviolet light, and other extreme weather conditions. In turn, this reduces the risk of scratches, chipping, abrasions, corrosion, fading, and other wear issues. In addition to being durable, powder coating is an attractive choice due to environmental advantages.

Decorative Paints

"Cheer your life with colours"

Decorative painting is important in architecture, where it is used to embellish both the exterior and interior of a building. The composition may correspond to the architectural structure of the building and accentuating various elements of design. **Kossan Decorative Paint** provided excellent durability against harsh weather; Excellent water and fungus resistance; Very good flow properties and good coverage. **Kossan Decorative Paint** got variety of colours for you to choose, cheer your life with colours!

Green Paints

"Green up your life with Kossan Green Paints."

Kossan Green Paint is an environmentally friendly paint. Traditional painting materials and processes can have harmful effects on the environment, including those from the use of lead and other additives, it often contain high quantities of VOCs. Volatile organic compounds are gases emitted by various solids or liquids, which have short and long-term adverse health effects. Low VOC paints improve indoor air quality and reduce urban smog. The beneficial characteristics of such paints include low odor, clean air, and safer technology, as well as excellent durability and a washable finish.

Insulation - saves money and makes your house more comfortable by helping to maintain the temperature throughout the house.
