

**SECTION 5 - PORTLAND CEMENT CONCRETE PAVEMENT**

		<u>Page</u>
5.1	DESCRIPTION	S5 - 1
5.2	MATERIALS	S5 - 1
5.2.1	Cement	S5 - 1
5.2.2	Aggregate	S5 - 1
5.2.3	Joint Filler	S5 - 1
5.2.4	Joint Sealants and Seals	S5 - 1
5.2.5	Waterproof Membrane	S5 - 2
5.2.6	Curing Materials	S5 - 2
5.3	PRODUCTION OF CONCRETE	
5.3.1	Concrete	S5 - 4
5.3.2	Equipment	S5 - 4
5.4	CONSTRUCTION	
5.4.1	Preparation of Subgrade or Subbase	S5 - 4
5.4.2	Construction by Machine	S5 - 4
5.4.2.1	Fixed Forms, Rails and Guide Wires For Machine Construction	S5 - 4
5.4.2.2	Construction by Fixed Form Paving Machine	S5 - 5
5.4.2.3	Construction by Slip Form Paving Machine	S5 - 6
5.4.3	Construction by Hand-Guided Method	S5 - 7
5.4.4	Manual Construction	S5 - 8
5.4.4.1	Side Forms For Manual Construction	S5 - 9
5.5	JOINTS	S5 - 10
5.5.1	Transverse Expansion Joints	S5 - 10
5.5.2	Transverse Contraction Joints	S5 - 10
5.5.2.1	Planes of Weakness	S5 - 11
5.5.2.2	Load Transfer Assemblies	S5 - 11
5.5.3	Longitudinal Joints	S5 - 11
5.5.4	Transverse Construction Joints	S5 - 11
5.5.5	Sealing Joints	S5 - 12
5.5.6	Concrete Saw	S5 - 12
5.6	SURFACE TEXTURE	
5.6.1	Texture of Running Surfaces	S5 - 13
5.6.2	Measurement of Texture Depth : Sand Patch Method	
5.6.2.1	Apparatus	S5 - 13
5.6.2.2	Method	S5 - 13
5.7	ROUNDING OF EDGES	S5 - 14
5.8	CURING	S5 - 14
5.9	REMOVING FORMS	S5 - 15
5.10	OPENING TO TRAFFIC	S5 - 15
5.11	TREATMENT OF MANHOLES AND GULLIES	S5 - 15

	<u>Page</u>
5.12 HORIZONTAL ALIGNMENTS, SURFACE LEVELS AND SURFACE REGULARITY	S5 - 16
