

MATERIALS

a. CEMENT

Types of Cement used are normally specified by the designer and noted in the '**Nota Am**' of the structural drawings

- Five (5) types are specified (Cl. 2.1-Section D).
- In the new 'Standard Specification for Building Works-2005' Low Heat Portland Cement has been replaced with *Slag Cement MS1387*.
- *Certificate of Test from the manufacturer is sufficient and included in monthly report.
