ISTANA KESULTANAN MELAKA

Bangunan ini merupakan replika Istana Kesultanan Melaka pada abad ke-15 berdasarkan tulisan yang dimuatkan didalam buku Sejarah Melayu. Sungguhpun bentuk bangunannya rumit dengan tujuh serambi tertutup dan bumbungnya cerun curam, namun tiada sebatang paku digunakan dalam pembinaannya. Di dalam bangunan ini boleh didapati gambaran aktiviti pada zaman kegemilangan Kesultanan Melaka.

MELAKA SULTANATE PALACE

This replica of the original 15th century palace of the Melaka Sultanate is based entirely on descriptions contained in the text Sejarah Melayu or the Malay Annals. Despite its complex structure of seven enclosed porches and sharply sloping roofs, not a single nail was used in its construction. Inside the building are displayed a series of tableaux recreating the many activities that took place in the palace during the heyday of the Melaka Malay Sultanate.
