LEVERAGING KM TECHNOLOGY FOR LEARNING & KNOWLEDGE SHARING

OCTOBER 12TH, 2018

Sasana Kijang, Bank Negara Malaysia

Organised by :

Knowledge
Connections

Partnered with :

Mesiniaga

QUIZZBIZZ

Describes emerging technologies that are going to act as a turning point into KM's portfolio. Cloud platform that will make KM accessible 24/7, cognitive computing and chatbots that enhances search and discovery, and robotic process automation to allow time for people to contribute their knowledge.

KM IN THE ERA OF IR 4.0

THE HUMAN DIMENSION OF KM

Explores the balance between people and processes that hold the most promise for KM, the practical steps that KM leaders should take to adapt, and the skills and traits they should look for, to "future proof" their teams in the light of new technology and capabilities.

2 BURNING ISSUES

- How does KM technology effectively help Communities of Practice share knowledge?
- Is technology just an enabler or does it also add value to organisational learning?

ABOUT KCONNECT

The KCONNECT seminars support, develop and promote the usage of knowledge capturing tools and techniques that encourage internal collaboration and stimulate organisational learning.
